

Production

Artistry Entertainment provides innovative forward-thinking approaches and techniques to projects and productions that offer emotional impact and real world value. We offer professional services for a wide variety of markets including corporate, institutional and government facilities, themed entertainment parks and venues, large specialty public assembly projects, television, film and video games.

Project Management

The best laid plans would not be executed proficiently without skilled project management. Artistry Entertainment prides itself in attaining the highest levels of professionalism when undertaking any assignment. Your reputation is our reputation and we are honored to serve you in this respect. With a single point of contact, we bring all the elements necessary together and coordinate each and every aspect of the project.

Detailed Design

The Detailed Design phase includes development of comprehensive drawings and technical specification documents to ensure a full understanding of how the systems and infrastructures are to be implemented. This phase requires extensive coordination between engineers, consultants and the other design disciplines to ensure the successful integration of systems into a facility. Artistry Entertainment has a tremendous amount of experience in specialized design for theme parks and large audience attractions.

Fabrication & Installation

There's nothing more exciting than seeing what was once only designs on paper finally begin to come to life. The fabrication and installation phase is where this all happens. Artistry Entertainment's vision for this phase includes not only the procurement and installation of equipment, but is a key time for the operations and maintenance staff to become familiar with the systems they will be using on a daily basis. As the project reaches its opening day, manuals and standard operating procedures are developed, giving the owner a step by step guide through the process of taking over control of their investment!
